1	-	NA	NA	We requesting to provide the typical drawing or sketch for scope of work gives more understanding about a battery limits between hot tapping contractor and Owner.	Bidder to note that it is difficult to cover all the aspects of scope of work of Hot Tapping including supply and installation in a typical drawing. Hence, bidder to refer the detailed scope of work of CONTRACTOR and GEL in the scope of work document for reference.
2	Section-III - SOR-	-	-	<p>In Section III of the SOR, kindly include a separate line item for the supply of Line Stop split tees along with the applicable flange ratings. The flanges of line stop fittings will be LOR/ LOR+flange and there will be extra completion plug (LOR/LOR+plug) will be included as compared to Hot tap fitting. These differences are significant, as Line Stop fittings and Hot Tap fittings are entirely distinct.</p> <p>Additionally, please specify the flange ratings for Part B (Services), since the equipment required for Line Stopple jobs is different, whereas Hot Tapping jobs can be managed even if flange ratings are not specified.</p>	<p>Bidder to note that separate SOR line item is provided for supply of material based on the material type i.e. 3-way tee and Split tee where in there is no significant difference in the material as far as stopple operation is concerned. Accordingly, no separate line items are provided for supply of material for line stop fittings. However, SOR line item for services is provided based on type of hot tapping operations in view of significant difference between tapping and line stop. Also, bidder may utilise the service line item for line stop to address the extra requirement for supply of material and services. Hence, separate SOR line item for line stop fittings are not provided.</p> <p>Additionally, bidder to refer the SOR line items for material supply, which is provided pressure class wise while putting the quote for services i.e. Part B of SOR.</p> <p>Also, bidder to refer revised SOR and BQC for reference.</p>
